

Missouri

State Fleet Efficiency and Alternative Fuel Program

Annual Report
Fiscal Year 2009

Missouri Department of Natural Resources
Division of Energy

DNR/EC-0710

PUB001195

This publication was prepared with the support of funds from the Oil Overcharge Settlement and State Energy Program through the U.S. Department of Energy (U.S. DOE) and the Missouri Department of Natural Resources' Division of Energy.

**Missouri
State Fleet Efficiency
and
Alternative Fuels Program
Fiscal Year 2009**

The Fuel Conservation for State Vehicles statute, Sections 414.400 - 414.417 RSMo, and the federal Energy Policy Act establish opportunities for Missouri state agencies to manage transportation fuel consumption and promote the use of clean domestic alternative fuels.

All state agencies are obligated to report their progress annually to the Missouri Department of Natural Resources' Division of Energy for the development of this annual report.

We are pleased to submit for your consideration this report on state fleet efficiency and alternative fuels use.

Sincerely,

MISSOURI DIVISION OF ENERGY

Executive Summary

Missouri's General Assembly passed Sections 414.400 - 414.417, RSMo, in 1991 to set standards for economically and environmentally responsible state fleet management. The Missouri statute seeks to increase the average fuel efficiency of the state fleet and increase the use of cleaner alternative transportation fuels in state vehicles. Missouri statutes, Section 414.406, require that the annual state fleet report include annual fuel consumption, number of vehicles, vehicle miles traveled, average fleet fuel economy, estimated cost savings and the state's use of alternative fuels. A copy of the Missouri statute can be found in Appendix A, and state fleet data submitted to the Department of Natural Resources by the reporting agencies can be found in Appendix B. This report covers fiscal year 2009, which is July 1, 2008 through June 30, 2009.

Missouri state agencies comply annually with statutory reporting requirements by providing the Missouri Department of Natural Resources' Division of Energy with vehicle operating data on their respective fleets. Along with other data, agencies provide vehicle operating data on the number of state-owned vehicles operated throughout the reporting period. All state agencies are required to comply with the statute and are subject to one or both of the fleet efficiency and alternative fuel requirements. The statute covers light-duty vehicles, defined as those under 8,500 pounds gross vehicle weight rating. Of the operated vehicles, agencies reported that 4,153 vehicles were eligible to meet the vehicle fuel efficiency and alternative fuel requirements as described in state statutes, and another 7,876 vehicles were reported as exempt from meeting those requirements. (Missouri statute allows for the exemption of vehicles based on vehicle type and use.) Altogether, state agencies operated a total of 12,029 vehicles.

While operating the 4,153 vehicles eligible to meet the statutory requirements, agencies reported logging a total of 49,951,371 miles. As a refueling requirement to travel this many miles, agencies also reported using 2,003,873 gallons of gasoline; 73,999 gallons of diesel fuel; 296,477 gallons of 85 percent ethanol (E85), including E85 used in exempt vehicles; 871 gallons of propane; and 0 cubic feet of compressed natural gas (CNG). Compared to Fiscal Year 2008, state employees drove two percent fewer miles in Fiscal Year 2009. Gasoline usage decreased by 461,896 gallons, down 19 percent compared to Fiscal Year 2008; diesel fuel usage decreased by 32,775 gallons, down 31 percent; E85 usage increased by 56,976 gallons, up 19 percent; propane usage decreased by 2856 gallons and CNG usage remained at zero usage.

State agencies also reported refueling state vehicles with biodiesel. Although biodiesel is normally used to refuel vehicles designated as exempt under the statute, the U.S. Department of Energy defines biodiesel blended at levels of 20 percent or greater as an alternative fuel. For reporting purposes, biodiesel used at the 20 percent or greater blend levels are sometimes combined, converted and shown throughout this report at the 100 percent blend level. When converted to the 100 percent blend level, state diesel vehicles were refueled with 319,790 gallons of biodiesel throughout the reporting period. This amounts to 1,598,950 gallons of biodiesel blended at the 20 percent level. The Missouri Department of Transportation, or MoDOT reported a decrease in diesel and biodiesel fuel consumption for FY09. The agency made a strong push for energy efficiency during the last half of FY08 and first half of FY09. Factors influencing MoDOT diesel and biodiesel consumption included a milder winter in most areas of

the state; using the most fuel efficient piece of equipment to do the job; performing work that required lighter pieces of fleet; replacing diesel units with gasoline units; and installing automatic idle shut down features on heavy equipment in most districts. In FY09, MoDOT did not revert to B20 use in late March and early April as in previous years, due to pricing (averaging .35 - .40 more per gallon). MoDOT returned to biodiesel use in May 2009.

Vehicle fuel efficiency standards described in Section 414.400, RSMo, require that agency fleets purchase new vehicles that meet or exceed standards set by the U.S. Environmental Protection Agency, or EPA. Therefore, new vehicles purchased by state agencies are to meet or exceed the corporate average fuel efficiency, or CAFE standards of 27.5 miles per gallon for passenger cars and 20.7 mpg for light-duty trucks. During the 2009 fiscal year, the overall average fuel efficiency of new vehicle acquisitions reported by agency fleets was 36.0 mpg for passenger cars and 28.4 mpg for light-duty trucks. The CAFE numeric system awards additional credit to alternative fuel vehicles. This boost can significantly increase the CAFE rating of alternative fuel vehicles and accounts for the high overall efficiencies of new vehicle acquisitions. Fuel economy standards require that agency fleets purchase new vehicles that meet or exceed the fuel efficiency that would be achieved if each vehicle in the agency's fleet met the CAFE standard. Of the 30 reporting state entities, all entities that purchased vehicles exceeded the CAFE standards.

Alternative fuel standards described in Section 414.410, RSMo, require that agency fleets purchase new vehicles that are capable of being refueled with an alternative fuel. Effective Jan.1, 2008, the Commissioner of the Office of Administration shall ensure that at least 70 percent of new state fleet vehicles are flexible fuel vehicles. Of the 30 reporting state entities, 13 entities met or exceeded the statutory requirement. Four state agencies did not meet the statutory requirement, and 13 entities were not required to meet the statutory requirement because they either did not purchase any new vehicles or they operated 15 or fewer eligible vehicles. Section 414.400, RSMo, also requires that at least 30 percent of all fuel used in eligible, state-owned alternative fuel vehicles, or AFVs, be the designated alternative fuel. During the 2009 fiscal year, 13 percent of all fuel used in eligible, state-owned AFVs was the designated alternative fuel. However, the statute provides for state agencies to take credit towards meeting their 30 percent goal by reporting the alternative fuel used in exempt vehicles. When the biodiesel used to refuel exempt diesel vehicles and the other fuels used in exempt AFVs are included in the calculation, the percent of alternative fuel that can be counted as used in AFVs rises from 13 percent to 27 percent.

The Department of Natural Resources' Division of Energy staff has worked throughout the reporting period to promote the continued and increased use of alternative fuels and has provided technical and programmatic assistance to state agencies. The Missouri Department of Transportation has begun installing signage for E85, where available, at exits along divided highways. In addition, the Division of Energy has designed alternative fuel signs for state agencies to place at their respective fleet lots. These signs remind state employees to refuel with the appropriate alternative fuel in AFVs whenever possible. E85 magnets, static window stickers and fuel door stickers are available from the Division of Energy. Colored labels for vehicle packets are also available to identify AFVs and provide local directions to refueling facilities. The division strongly urges state agencies that use packets for vehicle checkouts to include the

E-85 station listing in all of the E-85 vehicle packets. Otherwise, the E85 station link could be distributed through an agency's e-mail group address list. The listing can be found at www.moflexfuel.com

Introduction

Missouri's General Assembly passed Sections 414.400 - 414.417 RSMo in 1991 to set standards for economically and environmentally responsible state fleet management. The Missouri statute seeks to increase the average fuel efficiency of the state fleet and increase the use of cleaner alternative transportation fuels in state vehicles. Chapter 414 of the Missouri Revised Statutes can be found in Appendix A of this report.

All state agencies are required to comply with the statute and are subject to one or both of the fleet efficiency and alternative fuel requirements. The statute covers light-duty vehicles, defined as those under 8,500 pounds gross vehicle weight rating. The Department of Natural Resources is required to prepare an annual report on the Fuel Conservation for State Vehicles Program. The state agencies that do not meet the requirements for purchase of alternative fuel vehicles must obtain a waiver from the department before purchasing any light-duty vehicle other than an alternative fuel vehicle. The Office of Administration is required to ensure compliance with purchasing guidelines of alternative fuel vehicles and efficiency standards of conventional fuel vehicles.

State agencies have the opportunity to stretch operating budgets through greater fleet efficiency and to demonstrate approaches that reduce fuel consumption, manage travel efficiently and use cleaner alternative fuels. It also offers opportunities for interagency communication and cooperation.

Based on statutory requirements¹, the following are the Fuel Conservation for State Vehicles objectives:

1. *To achieve an efficient vehicle fleet.* Legislation effective Jan.1, 1999, requires state agencies to meet minimum guidelines for efficient vehicle fleet management as established by the Department of Natural Resources.
2. *To realize environmental and economic benefits of using alternative transportation fuels.* State government is to operate vehicles on alternative fuels such as 85 percent ethanol, propane, compressed natural gas or others if the fuels are within the incremental life-cycle cost caps designated in the statute. Legislation effective Jan.1, 1999, establishes the maximum incremental life-cycle cost difference at 10 percent, except for vehicles to be used in clean air maintenance and non-attainment areas of Kansas City and St. Louis, where the allowable incremental cost difference is 17 percent.
3. *To increase the number of alternative fuel vehicles in state fleets.* Effective Jan.1, 2008, the Commissioner of the Office of Administration shall ensure that at least 70 percent of new state fleet vehicles are flexible fuel vehicles.

¹All agencies of Missouri state government are subject to the provisions of the program, with the exception of the departments of Transportation and Conservation, which may develop fleet management plans independently. Certain off-road vehicles, special use vehicles, law enforcement vehicles and vehicles for which no published EPA CAFE standard exists are exempt from the provisions.

After July 1, 2001, at least 30 percent of the fuel used in state-owned AFVs must be an alternative fuel.

Compliance with these requirements by individual agencies and in the aggregate is documented in annual reports submitted by the agencies to the Department of Natural Resources' Division of Energy following the end of the fiscal year. Summary tables showing the fleet operating data submitted by the individual agencies and in the aggregate can be found in Appendix B. The 2009 fiscal year ran from July 1, 2008, through June 30, 2009.

Annual Fuel Consumption, Number of Vehicles and Vehicle Miles Traveled

Missouri Revised Statutes, section 414.406, require that the Missouri Department of Natural Resources prepare an annual state fleet report that documents annual fuel consumption, number of vehicles and vehicle miles traveled. Before covering the state fleet numbers, some necessary terms used throughout the report are briefly summarized from the description given in the statutes.

Many of the vehicles operated by state agencies are designated for duties that exempt the vehicles from vehicle fuel efficiency and alternative fuel requirements. These duties include off-road, maintenance, construction, trailer transport, law enforcement and emergency vehicles. Exempt vehicles also include vehicles that exceed the 8,500 gross vehicle weight rating, or GVWR.

Eligible vehicles are those vehicles operated by state agency fleets that are required to meet state-mandated vehicle fuel efficiency and alternative fuel requirements. Most eligible vehicles are primarily used for commuting from one location to another on established roadways. The terms *eligible* and *non-exempt* are used interchangeably throughout this report.

When identified throughout the report, gasoline gallon equivalence, or GGE is used as a unit of measure for alternative fuels. As a unit of measure, gasoline gallon equivalence is based on the fuel's energy content rather than the at-the-pump unit of measure normally shown in unit volume. An example of this is the comparison of a gallon of E85 to a gallon of gasoline. Since the energy content of E85 is less than that of gasoline, one gallon of E85 is equivalent to 0.7130 gallon of gasoline. As applied throughout this report, check Appendix C for more information on the conversion of alternative fuels from at-the-pump units of consumption to GGE.

As reported by the state agencies, shown in Table 1 are the annual fuel consumption numbers for state-owned vehicles operated during fiscal year 2009. Gasoline, diesel and alternative fuel consumption are compared for non-exempt, exempt and all vehicles operated throughout the reporting period. At the B-100 blend level, biodiesel consumption is included on the table as the majority of the alternative fuel used in exempt vehicles.

**Table 1. Fuel Consumption
Throughout Fiscal Year 2009**

Fuel Type	Non-Exempt Vehicles	Exempt Vehicles	All State Vehicles
Gasoline (gallons)	2,003,873	4,090,012	6,093,885
Diesel (gallons)	73,999	4,502,590	4,576,589
Alternative Fuel (gge)	174,817	382,618	557,435

*biodiesel is included as B100

Following the end of the fiscal year, both annual fuel consumption and annual fuel cost numbers are provided by state agencies to the Missouri Department of Natural Resources. Shown in Table 2 are the annual fuel cost numbers that directly correspond to the fuel consumption numbers shown in Table 1. At the B-100 blend level, the total cost of biodiesel consumption is included on the table as the majority of the alternative fuel cost shown for exempt vehicles.

**Table 2. Fuel Cost
Throughout Fiscal Year 2009**

Fuel Type	Non-Exempt Vehicles	Exempt Vehicles	All State Vehicles
Gasoline	\$5,201,598	\$8,382,528	\$13,584,126
Diesel	\$208,045	\$12,081,009	\$12,289,054
Alternative Fuel	\$640,788	\$986,012	\$1,626,800
Total	\$6,050,431	\$21,449,549	\$27,499,980

To provide a measure of the overall operational fleet size, Table 3 shows the number of state-owned vehicles operated by state agencies throughout fiscal year 2009. Since the agencies were asked to submit information on all vehicles operated throughout the reporting period, the numbers shown in Table 3 include all vehicles acquired, all vehicles in continuous service and all vehicles retired from state service throughout the period. Diesel vehicles cannot be classified as alternative fuel vehicles. Therefore, in Table 3, diesel vehicles are shown in the diesel entry, even if they were fueled by biodiesel.

**Table 3. Number of Vehicles Operated
Throughout Fiscal Year 2009**

Vehicle Type	Non-Exempt Vehicles	Exempt Vehicles	All State Vehicles
Gasoline	2,171	4,302	6,473
Diesel	32	2,770	2,802
Alternative Fuel	1,950	804	2,754
Total	4,153	7,876	12,029

During fiscal year 2009, the vehicle miles traveled in non-exempt state vehicles was 18,612,417 miles in gasoline and hybrid vehicles, 932,221 miles in diesel vehicles and 30,406,733 miles in alternative fuel vehicles. Agencies are not required to submit the vehicle miles traveled in state vehicles that are exempt from fuel efficiency and alternative fuel requirements.

Annual maintenance cost data is an important part of the formula required to find the total operating cost for state-owned vehicles. Shown in Table 4 are the annual maintenance costs incurred for the repair and upkeep of state-owned vehicles operated throughout fiscal year 2009. Diesel vehicles cannot be classified as alternative fuel vehicles. Therefore, in Table 4, diesel vehicles are shown in the diesel entry, even if they were fueled by biodiesel.

Table 4. Maintenance Cost Throughout Fiscal Year 2009

Vehicle Type	Non-Exempt Vehicles	Exempt Vehicles	All State Vehicles
Gasoline	\$1,038,679	\$2,622,807	\$3,661,486
Diesel	\$85,604	\$6,839,871	\$6,925,475
Alternative Fuel	\$1,070,068	\$425,367	\$1,495,435
Total	\$2,194,351	\$9,888,045	\$12,082,396

Caution should be exercised when interpreting the reported maintenance cost numbers shown throughout this report since the method used for collecting and reporting maintenance cost could be different from one agency to the next. For example, most agencies enter into vehicle repair and upkeep contracts with outside organizations while other agencies employ vehicle maintenance staff responsible for the repair and upkeep of agency vehicles.

Average Fleet Fuel Economy

Although a procedural process for the computation of average fleet fuel economy is not described in Missouri law, the statutes do require that each agency's overall vehicle fleet fuel efficiency for non-exempt state vehicles meet or exceed the standards set by the federal government.

On the federal side, the U.S. Environmental Protection Agency, with assistance from the U.S. Department of Transportation, has developed a rating system for measuring vehicle fuel efficiency. The rating system is called corporate average fuel economy, or CAFE. CAFE is a comprehensive fuel efficiency rating system that was developed to measure the vehicle fuel efficiency of vehicles sold in the United States. Since CAFE is an average, a company can sell vehicles that fall below the CAFE standards as long as the company's overall averages stay within the standards.

The CAFE standards are 27.5 mpg for passenger cars and 20.7 mpg for light-duty trucks. Station wagons are included under the passenger car category while light-duty trucks include pickups, SUVs and vans.

The Missouri Department of Natural Resources' Division of Energy has developed a set of procedures for computing the average fleet fuel economy using the CAFE system of measuring vehicle fuel efficiency.

New vehicle acquisitions are included in the computation of the average fleet fuel economy. By including only new vehicle acquisitions, emphasis is placed on the purchase of vehicles that meet or exceed the federal CAFE standards, and this approach is compatible with federal Energy Policy Act requirements.

As shown in Figure 1, state agencies exceeded the federal standard by purchasing new passenger cars with an average CAFE rating of 36.0 mpg. Agencies also exceeded the federal standard with new acquisitions of light-duty trucks. Agencies purchased new light-duty trucks that earned an overall CAFE rating of 28.4 mpg. Although other vehicles may have been purchased throughout the reporting period, only those vehicles not exempt from state vehicle fuel efficiency requirements were included in the averages.

The CAFE numeric system awards additional credit to alternative fuel vehicles. This boost can significantly increase the CAFE rating of alternative fuel vehicles. Some examples include the 2009 E85 Chevrolet Impala, awarded a CAFE rating of 37.45 mpg, and the 2009 E85 Dodge Grand Caravan, awarded a CAFE rating of 32.62 mpg.

All agencies made purchases that on average exceeded the CAFE standards.

For additional information, the CAFE ratings earned by each agency and the total ratings earned by the entire state fleet are shown in the fuel-economy tables in Appendix D.

Shifting from manufacturer-rated performance to actual on-road performance, some agencies are reacting to higher fuel prices by driving fuel-efficient hybrid vehicles. At the agency level, the Department of Transportation operated nine non-exempt hybrid vehicles that achieved an average on-road fuel efficiency of 26.92 mpg during fiscal year 2009. The Department of Transportation operated eight exempt hybrid vehicles. The Department of Natural Resources operated 14 hybrid vehicles that achieved an average on-road fuel economy of 29.75 mpg. Overall, as shown in Figure 2, state hybrid passenger cars achieved an average of 12 mpg greater than that of other gasoline-powered passenger cars operated by the state fleet. In the light-duty truck category, state hybrid vehicles achieved an average of 5 mpg greater than the state's other gasoline-powered light-duty trucks.

Hybrid electric vehicles, or HEVs, are primarily propelled by an internal combustion engine, just like conventional vehicles. However, HEVs also convert energy normally wasted during coasting and braking into electricity, which is stored in a battery until needed by the electric motor. The electric motor is used to assist the engine when accelerating or hill climbing and in low-speed driving conditions where internal combustion engines are least efficient. Unlike all electric vehicles, HEVs do not need to be plugged into an external source of electricity to be recharged; conventional gasoline and regenerative braking provide all the energy the vehicle needs. (Source: Fuel Economy Guide, U.S. Department of Energy & U.S. Environmental Protection Agency)

Alternative Fuel Use and Alternative Fuel Vehicle Acquisitions

As defined by RSMo, Section 414.400, alternative fuels are those motor vehicle fuels that are substantially not unleaded gasoline or diesel, otherwise, contributing to potential energy security and environmental benefits. The Department of Natural Resources prepares and distributes this annual state fleet report to document progress in achieving the requirements and goals of sections 414.400 to 414.417, which includes, along with other vehicle information, the state fleet's use of alternative fuels.

Both an alternative fuel and a renewable fuel, E85 is produced from 85 percent ethanol blended with 15 percent unleaded gasoline.

As shown in Figure 3, during the 2009 fiscal year, state-owned E85 vehicles were refueled with 296,477 gallons of E85 (exempt E85 vehicle usage included). Because of limited availability and other refueling issues, state-owned E85 vehicles were also refueled with 1,744,832 gallons of unleaded gasoline.

Figure 3 - Missouri State Fleet
Gallons of Ethanol 85 Used in Ethanol 85 Vehicles

Figure 4 - Missouri State Fleet
Gallons of Biodiesel (B20) Used in Diesel Vehicles

Biodiesel, another alternative fuel with renewable fuel content, is used in state-owned diesel vehicles.

Although biodiesel is used to refuel state vehicles that are generally exempt under the statute, biodiesel blended at levels of 20 percent or greater is defined by the U.S. Department of Energy as both an alternative and renewable fuel. For federal reporting purposes, the gallons of biodiesel used at the 20 percent or greater blend levels are combined, converted and shown in some parts of this report at the 100 percent blend level. When converted to the 100 percent blend level, state diesel vehicles were refueled with 319,790 gallons of biodiesel during the reporting period. As shown in Figure 4, this amounts to 1,598,950 gallons of biodiesel blended at the 20 percent level.

Throughout the 2009 fiscal year, the Missouri Department of Transportation used 319,183 gallons of biodiesel measured at the 100 percent blend level. The Missouri Department of Transportation, or MoDOT, reported decreased diesel and biodiesel fuel consumption for FY09.

The agency made a strong push for energy efficiency during the last half of FY08 and first half of FY09. Factors influencing its diesel and biodiesel consumption included a milder winter in most areas of the state; using the most fuel efficient piece of equipment to do the job; performing work that required lighter pieces of fleet; replacing diesel units with gasoline units; and installing automatic idle shut down features on heavy equipment in most districts. In FY09, MoDOT did not revert to B20 in late March and early April as in previous years, due to pricing (averaging .35 - .40 more per gallon). MoDOT resumed biodiesel use in May 2009. The Department of Corrections used 383 gallons; the Department of Conservation used 53 gallons; and the Department of Natural Resources used 170 gallons.

Besides the alternative fuels that are processed from renewable sources, another group of alternative fuels works to reduce tailpipe emissions. This group of alternative fuels includes propane, compressed natural gas and electricity. During the reporting period, state vehicles were refueled with 871 gallons of propane; 0 cubic feet of compressed natural gas; and 0 kWh of electricity. Propane is offered at many retail outlets throughout the state while compressed natural gas is currently offered at only one refueling site.

Another important topic when reporting alternative fuel use is the percent of alternative fuel actually put into state-owned vehicles. Many AFVs can be refueled with either the designated alternative fuel or regular unleaded gasoline. State statutes specify that 30 percent of all fuel used in state-owned AFVs should be the designated alternative fuel. As shown in Figure 5, the percent of alternative fuel used in state operated non-exempt alternative fuel vehicles was 13 percent throughout fiscal year 2009.

The statute, however, provides for state agencies to take credit towards meeting their 30 percent purchasing goal by reporting the alternative fuel used in exempt vehicles. When the biodiesel used to refuel exempt diesel vehicles and the other fuels used in exempt AFVs are included in the calculation, the percent of alternative fuel that can be accredited as used in AFVs rises from 13 percent to 27 percent.

To break out the alternative fuel usage by alternative fuel types, the percent of alternative fuel used in state alternative fuel vehicles was 13 percent E85 in flexible fuel E85 vehicles, zero percent CNG in dual-fuel CNG vehicles and four percent propane in dual-fuel propane vehicles.

Figure 5 - Missouri State Fleet

The Percent of Alternative Fuel Use in Alternative Fuel Vehicles

Biodiesel and Exempt Usage Not Included

None of the percent breakouts include biodiesel or *other* exempt vehicle usage. See Table 5 for the corresponding consumption numbers shown in gallons for gasoline and in gasoline gallons equivalence for the alternative fuels.

**Table 5. The Percent of Alternative Fuel Use
In Alternative Fuel Vehicles Throughout Fiscal Year 2009**

Vehicle Fuel Type	Number of Vehicles	GAS/DSL (gal/GGE)	Alternative Fuel (GGE)	Total Fuel Use (GGE)	% Alternative Fuel Use
B20 (exempt vehicles)	2,770	3,673,763	1,753,672	5,427,435	32%
E85	1,927	1,118,385	167,261	1,285,646	13%
E85 (exempt vehicles)	783	626,448	44,128	670,576	7%
Propane	17	10,537	392	10,929	4%
Propane (exempt vehicles)	12	6,508	283	6,791	4%
CNG	3	551	0	551	0%
CNG (exempt vehicles)	0	0	0	0	0%
Electric	3	0	0	0	0%
Total (non-exempt vehicles only)	1,950	1,129,473	167,653	1,297,126	13%
Total (exempt vehicles only)	3,565	4,306,719	1,798,083	6,104,802	29%
Total	5,515	5,436,192	1,965,736	7,401,928	27%

Missouri statutes also describe acquisition requirements for AFVs. Effective Jan.1, 2008, the Commissioner of the Office of Administration shall ensure that at least 70 percent of new state fleet vehicles are flexible fuel vehicles. Of the 30 reporting state entities, 13 entities met or exceeded the statutory requirement. Four state agencies did not meet the statutory requirement, and 13 entities were not required to meet the statutory requirement because they either did not purchase any new vehicles or they operated 15 or fewer eligible vehicles. The actual breakouts for each state entity, the acquisitions of alternative fuel vehicles and the percent of alternative fuel use are shown in Appendix D.

**Table 6. Number of Alternative Fuel Vehicles
Stationed at Fleet Locations Throughout Missouri**

	FY'05	FY'06	FY'07	FY'08	FY'09
Jefferson City	454	793	624	875	762
Kansas City	110	113	228	322	349
St. Louis	88	81	137	229	245
Other	518	482	1,013	1,306	1,407
Total	1,170	1,469	2,002	2,732	2,763

As shown in Table 6, state agencies have alternative fuel vehicles stationed at locations throughout Missouri. Whether alternative fuel vehicles can be refueled with the designated alternative fuel is almost entirely dependent on where the vehicles are located. State employees are best able to refuel the vehicles with the designated alternative fuel if doing so is convenient. Vehicle location is also important since the EPA has set air quality requirements for both Kansas City and St. Louis. Because it is the state capital, Jefferson City is the hub of state government activities. Many agencies locate at least some, if not all of their vehicles, in the Jefferson City area. The types of refueling sites in the Jefferson City area are E85, propane and biodiesel.

To compare the operating cost of alternative fuel vehicles to traditional fuel vehicles, operating cost data submitted by the agencies to the Division of Energy can be converted into an average operating cost per mile. As shown in Table 7, vehicle operating costs are broken out by maintenance, fuel and the overall total.

Table 7. Average Non-Exempt Vehicle Operating Cost In Cents per Mile Throughout Fiscal Year 2009

Vehicle Type	Maintenance	Fuel	Total
Hybrid (Cars Station Wagons)	6.4	7.0	13.4
E85 (Cars Station Wagons)	3.5	10.0	13.5
Hybrid (LDTs, Vans SUVs)	4.0	9.6	13.6
E85 (LDTs, Vans SUVs)	3.2	12.3	15.5
Gasoline (Cars Station Wagons)	5.1	10.6	15.7
CNG (LDTs, Vans SUVs)	2.7	13.2	15.9
Gasoline (LDTs, Vans SUVs)	5.7	16.3	22.0
CNG (Cars Station Wagons)	15.9	8.6	24.5
Propane (LDTs, Vans SUVs)	15.4	17.8	33.2
Diesel (LDTs, Vans SUVs)	9.2	24.4	33.6

If E85 is 71 percent as efficient as gasoline, how can the per mile fuel cost of E85 vehicles (cars and station wagons) be 2.2 cents per mile lower than gasoline vehicles (cars and station wagons)? Possible explanations for this differential include: As posted at the retail outlets, the

per-gallon cost of ethanol at times has been lower than gasoline throughout the reporting period. State agencies also provided data that show the actual on-road fuel efficiency of E85 vehicles (cars and station wagons) can be greater than gasoline vehicles (cars and station wagons) when the E85 vehicles are refueled with unleaded gasoline. Another reason for the similar fuel operating cost is that E85 vehicles (cars and station wagons) are often refueled with unleaded gasoline.

Program Status

The Missouri Revised Statutes, Sections 414.410 - 414.417, establish guidelines for the current vehicle fuel efficiency and alternative fuel vehicles program. The established program includes the writing and distribution of an annual state fleet report, vehicle fuel efficiency standards for new vehicle acquisitions, requirements for alternative fuel use in alternative fuel vehicles and purchasing requirements for the acquisition of alternative fuel vehicles.

Participating state agencies submitted annual operating data on agency vehicle operations and acquisitions made during fiscal year 2009. In recent years, most vehicle purchases have met CAFE standards, and the actual average fuel efficiency for cars and light trucks is expected to significantly increase in the coming years. Compliance with the purchasing requirements is administered by the Office of Administration, Department of Transportation, Department of Conservation and higher education institutions.

The numbers and types of alternative fuel vehicles currently available to state agencies and the public from manufacturers are steadily increasing. All major U.S. vehicle manufacturers are producing alternative fuel vehicles. The number of available alternative fuel stations also is increasing.

Mo Flex Fuel publishes a listing of E85 refueling locations on the Web at www.moflexfuel.com/printstations.php. At the time of printing this report, 108 E85 stations are currently available for refueling.

The Missouri Soybean Association publishes a listing of biodiesel suppliers on the Web at www.mocorn.org.

Numerous propane refueling sites are located throughout Missouri. The Missouri Propane Gas Association in Jefferson City has a listing of propane refueling locations.

As part of an ongoing effort to increase alternative fuel usage among state employees, the Division of Energy has actively promoted the use of alternative fuels in state vehicles. The division and industry representatives are working to encourage further use of alternative fuels in appropriate AFVs. Information tools made available to encourage such use include the following:

- Colored labels for vehicle packets are available from the division to identify AFVs and provide local directions to refueling facilities. E85 magnets, static window stickers, and fuel door stickers are also available from the division.
- E85 pumps at each gas station are prominently labeled.
- The division urges state agencies that use packets for vehicle checkouts to include an E85 station listing in all vehicle packets.
- Links to online E85 station listings (available from www.moflexfuel.com) may be distributed through agency e-mails.
- Generic access and passwords were established for state employees to use on the Wright Express fleet card WEXOnline system. Driver resource tools on the system include alternative fuel and diesel fuel station directories, and search tools to find locations

- accepting the card and the lowest fuel prices.
- The Missouri Department of Transportation has installed signage for E85, where available, at exits along divided highways. In addition, the Division of Energy has designed alternative fuel signs for state agencies to place at their respective fleet lots. These signs remind state employees to refuel with the appropriate alternative fuel in AFVs whenever possible.

Program Recommendations

The following recommendations are based primarily on guidance provided within Missouri Revised Statute, Sections 414.400 – 414.417, and the annual reports submitted by the agencies to the Division of Energy.

- Encourage state employees to carpool and use mass transit.
- Expand the use of telecommunication systems to decentralize work and reduce the need for travel to meetings, conferences and other offices. Consider options such as e-mail, facsimile and teleconferencing to reduce the need for travel.
- Continue information and promotion. The Division of Energy and other organizations continue to encourage the agencies to purchase alternative fuel vehicles and promote the use of alternative fuel as a replacement for traditional vehicle fuels.
- Train state employees in the operation of alternative fuel vehicles and refueling with alternative fuels to increase their comfort in using alternative fuels.
- Facilitate placement of alternative fuel vehicles at agency locations closest to refueling locations selling the alternative fuel used.
- Facilitate installation of additional alternative fuel refueling stations across the state.

Appendices

Appendix A

Federal and Missouri Alternative Fuel Acts: Comparison of Key Provisions

Clean Air Act	Energy Policy Act	Missouri Sections 414.400 - 417 RSMo, 1999
Applicability		
Twenty-two metropolitan areas with populations of 250,000 or more (1980 census) with either serious, severe or extreme ozone or carbon monoxide areas.	Metropolitan areas with a 1980 population of 250,000 or more.	All state-owned vehicles throughout the state.
Fleets Subject to Act		
Fleets of 10 or more vehicles that are centrally fueled or capable of being centrally fueled.	Fleets with at least 20 vehicles that are centrally fueled or capable of being centrally fueled in a metropolitan area; however, this requirement applies only if a fleet also has at least 50 vehicles within the United States.	State-owned fleets with more than 15 vehicles.
Exemptions		
<p>Vehicles that are garaged at a personal residence overnight are to be considered <u>not</u> capable of central fueling.</p> <p>Law enforcement vehicles.</p> <p>Emergency vehicles.</p>	<p>Private fleet vehicles that are garaged at home overnight are exempted.</p> <p>Law enforcement vehicles. The Secretary of Energy may terminate this exemption.</p> <p>Emergency vehicles.</p>	<p>Off-road vehicles, maintenance and construction vehicles and transport trailers.</p> <p>Law enforcement vehicles.</p> <p>Emergency vehicles.</p>
Fuels		
Any fuel that meets the emission standard may be used, including reformulated gasoline, clean diesel, ethanol, methanol, propane, electricity and natural gas.	Alternative fuels include methanol, ethanol, natural gas, propane, biodiesel and electricity. Reformulated gasoline is not considered to be an alternative fuel.	Alternative fuels include 85 percent methanol, 85 percent ethanol, natural gas, propane, 20 percent biodiesel, hydrogen and electricity. Reformulated gasoline is not considered to be an alternative fuel.

Clean Air Act	Energy Policy Act	Missouri Sections 414.400 - 417 RSMo, 1999
Weight Limits		
Includes automobiles and trucks up to 26,000 pounds gross vehicle weight.	Includes vehicles with a gross vehicle weight of less than or equal to 8,500 pounds.	For reporting purposes, state agencies are including only those eligible vehicles less than or equal to 8,500 pounds GVWR.
Purchase Dates		
Beginning with model year 1998.	<p>Federal fleet – 1993; state fleets - model year 1996.</p> <p>Private and municipal fleets - model year 1999 or later (subject to ruling by the secretary of energy that a private/municipal fleet program is needed.)</p> <p>Fuel provider fleets – model year 1996.</p>	<p>Acquire vehicles capable of using alternative fuels:</p> <p>70 percent after Jan.1, 2008 By July 1, 2002, 30 percent of fuel used in AFVs must be an alternative fuel.</p>
Vehicle And Fuel Availability		
There are no exemptions provided in the law in the event vehicles or fuel are not available.	The secretary of energy must exempt a fleet if vehicles or fuels are not available.	<p>The Missouri Department of Natural Resources' director may reduce any percentage specified or waive requirements upon receipt of certification supported by evidence to the director that:</p> <ol style="list-style-type: none"> 1) Fuels are not available; 2) Fuels do not meet cost limitations; or 3) Fuels do not meet energy conservation or emissions criteria.

Missouri Revised Statutes
Chapter 414
Fuel Regulation and Conservation
Section 414.400

August 28, 1999

Definitions--program for state fuel consumption reduction, fleet management and promotion of alternative fuels, University of Missouri, included duties--exceptions for certain vehicles.

414.400. 1. As used in sections 414.400 to 414.417, the following terms mean:

- (1) "Alternative fuel," any fuel, including any alcohol fuel containing eighty-five percent or more by volume of such alcohol or other such percentage not less than seventy percent if determined by the United States Department of Energy by rule to be necessary to provide for the requirements of cold start, safety, or vehicle functions, natural gas, liquefied petroleum gas, any fuel other than alcohol derived from biological materials when designated by the United States Department of Energy as an alternative fuel, and hydrogen, or any power source, including electricity, and any other fuel that the United States Department of Energy determines by final rule is substantially not petroleum and would yield substantial energy security and environmental benefits, used in a vehicle that complies with the standards and requirements applicable to such vehicle pursuant to sections 414.400 to 414.417 when using such fuel or power source;
- (2) "CAFE standard," the federal Corporate Average Fuel Economy standard, 15 U.S.C. 2002 or 40 CFR Parts 86 and 600 or 49 CFR Part 538 or proposed rule 49 CFR Part 538 until such rule is finalized;
- (3) "Department", the department of natural resources;
- (4) "Director", the director of the department of natural resources;
- (5) "State agency", the same meaning as such term is defined in section 536.010, RSMo;
- (6) "Vehicle fleet", any fleet comprised of vehicles with a manufacturer's gross vehicle weight rating of not more than eight thousand five hundred pounds registered for operation on the highways of this state pursuant to chapter 301, RSMo.

2. The department in consultation with the commissioner of administration shall develop and implement a program to manage and progressively reduce state agency vehicle fleet fuel consumption and promote the use of alternative fuels. The program shall require state agencies to meet minimum guidelines for efficient fleet management. Such guidelines shall be updated and revised every two years and shall require the overall vehicle fleet fuel efficiency for each agency to meet or exceed the fuel efficiency that would be achieved if each vehicle in the agency's fleet met the CAFE standard. The department may promulgate rules necessary to implement such guidelines. Further, provided that suppliers or state agencies have or can reasonably be expected to have established alternative fuel refueling stations as needed, the program shall require that at least thirty percent of all motor fuel purchased annually for use in alternative fuel vehicles, calculated in gasoline gallon equivalents, to be alternative fuel by July 1, 2001. Any alternative fuel purchased by a state agency for use in vehicles not included in their vehicle fleet as defined in subsection 1 of this section, calculated in gasoline gallon equivalents, may be credited toward the annual alternative fuel purchase goal. The program shall

systematically replace existing state-owned vehicles and vehicles paid for with any state money, including vehicles purchased by the university system, with vehicles manufactured, assembled or produced in the United States, as required by sections 34.350 to 34.359, RSMo.

3. The commissioner of administration shall identify specific vehicle models within each vehicle procurement class that meet or exceed the CAFE standard. State agencies shall identify specific vehicle models within each vehicle procurement class that have a life cycle cost which is less than or equal to the average life cycle cost of those vehicles in the class which are manufactured, assembled or produced in the United States. Life cycle costs shall include but are not limited to the original cost of the vehicle, conversion cost if applicable, costs associated with vehicle emissions to the extent that such statistics are available, and projected cost of operation, including fuel cost and maintenance and salvage value to the extent that reliable maintenance and salvage value statistics are available. Unless a state agency submits to the department a fleet efficiency plan that complies with the minimum guidelines for energy efficiency established pursuant to subsection 2 of this section, or unless otherwise approved by the office of administration pursuant to subsection 4 of this section, all purchases of vehicles for state agency vehicle fleets shall meet the above standards.

4. The commissioner of administration may waive the CAFE standard requirements of subsection 3 of this section, for only those vehicles which satisfy one or more of the following conditions, for any state agency upon receipt of documentation that has been certified by the director of the state agency as satisfying one or more of the following conditions:

- (1) Such vehicles are used primarily in off-road, construction, or road maintenance applications;
- (2) Such vehicles are regularly used in the movement of maintenance or construction equipment;
- (3) Such vehicles are trucks or utility vehicles as defined by the office of administration that are regularly used to transport trailers for the purpose of moving state equipment; or
- (4) Such vehicles are vehicles with manufacturer-stated seating capacity exceeding that for six persons and the director of the agency has certified that the vehicle will be used to transport its rated capacity in persons and/or cargo. Agencies which are granted such waivers shall comply with the planning requirements of section 414.403.

5. The purchase of all class III vehicles, as defined by the office of administration, shall be approved through the appropriations process for all departments except the highway patrol. The provisions of this subsection shall not apply to the purchase of used vehicles from the highway patrol.

(L. 1991 H.B. 45 § 1, A.L. 1998 S.B. 619)

Effective 1-1-99

Chapter 414
Fuel Regulation and Conservation
Section 414.403

August 28, 1996

Vehicle fleet energy conservation plan to be developed by each state agency, purpose of plan, content--plan to be submitted to department of natural resources, when.

414.403. 1. Each state agency, with assistance from the department of natural resources, shall develop and implement a vehicle fleet energy conservation plan for the purposes of reducing vehicle fuel consumption. Plans shall be submitted to the director of the department of natural resources by January 1, 1993. Such plans shall include:

- (1) A timetable by which fleet vehicles shall be replaced with vehicles which exceed the average fuel economy for their vehicle class as outlined in section 414.400;
- (2) Options for the use of demonstrated innovative technologies that promote energy conservation and reduced fuel consumption;
- (3) Methods that promote efficient trip planning and state vehicle use; and
- (4) Car-pooling and van pooling for agency employees for commuting and job-related travel.

2. The department of conservation and the department of highways and transportation may develop their own vehicle fleet energy conservation plan. Such plans shall meet the objectives of sections 414.400 to 414.417 and shall comply with the reporting requirements of sections 414.400 to 414.417.

(L. 1991 H.B. 45 § 2)

Chapter 414
Fuel Regulation and Conservation
Section 414.406

Vehicle fleet plan reviewed--office of administration to purchase only vehicles conforming to plan--annual report, content.

414.406. 1. The director of the department of natural resources shall review each agency's vehicle fleet plan and the vehicular demands of the agency by vehicle class. The office of administration shall only purchase for an agency those vehicles which conform to the agency's plan as outlined in sections 414.400 and 414.403.

2. Each state agency shall annually file a report with the director of the department of natural resources on forms provided by the department showing its progress in achieving the requirements and goals of sections 414.400 to 414.417. The director of the department of natural resources shall compile such information into an annual report and submit such report to the commissioner of administration, the secretary of the senate, the clerk of the house of representatives and the chairman of each committee of jurisdiction of the general assembly.

3. The director's report shall document progress in achieving the requirements and goals of sections 414.400 to 414.417 and shall include, but not be limited to, annual fuel consumption,

number of vehicles, vehicle miles traveled, average fleet fuel economy, estimated cost savings and state use of alternative fuels.

(L. 1991 H.B. 45 § 3)

Chapter 414

Fuel Regulation and Conservation

Section 414.410

Motor vehicle alternative fuel use plan to be developed by department of natural resources--powers and duties--state agency fleets of fifteen or more vehicles, time table for using alternative fuels.

414.410. 1. The director shall develop a motor vehicle alternative fuel use plan. The director shall cooperate with state agency fleet operators, vehicle manufacturers and converters, fuel distributors and others to identify the types of vehicles which could be converted to alternative fuels. The director shall consider range, specialty uses, fuel availability, vehicle cost, vehicle manufacturing and conversion capability, safety, resale values, and other relevant factors.

2. The department shall recommend alternative fuels which state agencies and state universities may consider when purchasing vehicles. The department shall consider the content of vehicle exhaust emissions, the relative efficiency of the fuel, the relative efficiency of the processes required to produce the fuel and the characteristics of air emissions associated with the production of that fuel. It shall recommend for state use those alternative fuels which best satisfy the goals of energy conservation and emissions reduction.

3. Any state agency which operates a fleet of more than fifteen motor vehicles shall acquire vehicles capable of using alternative fuels as follows (has since been revised to 70%):

(1) At least ten percent of the agency's fleet vehicles acquired between July 1, 1994, and July 1, 1996;

(2) At least thirty percent of the agency's fleet vehicles acquired between July 1, 1996, and July 1, 1998; and

(3) At least fifty percent of the agency's fleet vehicles acquired between July 1, 1998, and July 1, 2000, and each biennial period thereafter.

If a state agency exceeds any such biennial acquisition goal, or has purchased vehicles capable of using alternative fuels before July 1, 1994, such purchases may be credited to any future biennial acquisition goal. If a state agency has purchased vehicles capable of using alternative fuels but not included in their vehicle fleet as defined in subsection 1 of section 414.400, such purchases may be credited toward any biennial acquisition goal. If a state agency fails to meet a biennial acquisition goal, the commissioner of administration shall not authorize for such agency the purchase of any vehicle not capable of using alternative fuels until such acquisition goal is met, unless the director has reduced or waived the acquisition goal pursuant to subsection 1 of section 414.412.

(L. 1991 H.B. 45 § 4 subsecs. 1, 2, 3, A.L. 1998 S.B. 619)

Effective 1-1-99

Chapter 414

Fuel Regulation and Conservation

Section 414.412

Alternative use of fuel, waived or percentage reduced by director of natural resources, certified evidence required--other vehicles, ethanol use required, exceptions.

414.412. 1. The director may reduce any percentage specified or waive the requirement of subsection 3 of section 414.410 for any state agency upon receipt of certification supported by evidence acceptable to the director that:

(1) The agency's vehicles will be operating primarily in an area in which neither the agency nor a supplier has or can reasonably be expected to have a central refueling station for alternative fuels; or

(2) The agency is unable to acquire or operate vehicles within the cost limitations of section 414.400 or section 414.415; or

(3) The use of alternative fuels would not meet the energy conservation and exhaust emissions reduction criteria of subsection 2 of section 414.410.

2. State agencies shall submit information describing the acquisition and use of vehicles capable of using alternative fuels to the department in a format prescribed by the department. The report shall include for each vehicle model capable of using alternative fuel:

(1) The types of alternative fuels used;

(2) The number of miles traveled using alternative fuels and the ratios to the total numbers of miles traveled;

(3) The number of vehicles owned which are capable of using alternative fuels;

(4) Maintenance costs.

3. Each state-owned vehicle equipped to operate on gasoline, other than vehicles using alternative fuel, shall use a fuel ethanol blend as defined in section 142.027, RSMo, when available at a competitive price, as its motor fuel, unless the United States Environmental Protection Agency, or the governor by executive order, promulgates rules which prohibit, limit or otherwise regulate the use of ethanol-blended fuels in ozone nonattainment areas, as defined by Section 107 of the federal Clean Air Act, as amended, or in an* area designated as a maintenance area for ozone under Section 175A of the federal Clean Air Act, as amended, state-owned vehicles shall not be required to use a fuel ethanol blend.

(L. 1991 H.B. 45 § 4 subsecs. 4, 5, 6, A.L. 1993 H.B. 611, A.L. 1998 S.B. 619)

Effective 1-1-99

Chapter 414

Fuel Regulation and Conservation

Section 414.415

Percentage requirements, how state agencies to comply.

414.415. State agencies may meet the percentage requirements of sections 414.410 to 414.415 through purchase of original equipment manufactured alternative fuel vehicles or the conversion of vehicles, in accordance with federal and state requirements and applicable safety laws. Vehicles purchased pursuant to sections 414.410 to 414.415 shall not exceed the cost of conventional fuel vehicles of the same make and model by more than ten percent, using life cycle costing methods calculated pursuant to criteria in subsection 3 of section 414.400, except that vehicles purchased pursuant to sections 414.410 to 414.415 that are based for the life of the vehicle and used primarily in maintenance and nonattainment areas defined with regard to the National Ambient Air Quality Standards of the federal Clean Air Act, as amended, 42 U.S.C. 7401 et seq., shall not exceed such cost of conventional fuel vehicles of the same make and model by more than seventeen percent. The commissioner of administration in purchasing, leasing, maintaining or converting vehicles for alternative fuels use shall comply with all applicable safety standards promulgated by the United States Department of Transportation.

(L. 1991 H.B. 45 § 4 subsec. 7, A.L. 1998 S.B. 619)

Effective 1-1-99

Chapter 414

Fuel Regulation and Conservation

Section 414.417

**Criminal law enforcement vehicles and certain other vehicles, law not applicable--
demonstration vehicles for alternative fuels authorized.**

414.417. 1. Sections 414.400 to 414.417 shall not apply to the purchase or lease of a vehicle to be used primarily for criminal law enforcement or to the purchase or lease of a motorcycle, all-terrain vehicle, ambulance, or any type of vehicle for which the Environmental Protection Agency has not published fuel economy comparisons.

2. Notwithstanding the provisions of sections 414.400 to 414.417, the department of natural resources may acquire vehicles which use alternative fuels for the purposes of assessing and demonstrating either or both alternative vehicles and alternative fuels.

(L. 1991 H.B. 45 § 5)

CNG	Cars and Station Wagons	2		5,749	203	0	\$492	\$0	\$917
	LDTs, Vans and SUVs	1		6,280	348	0	\$832	\$0	\$170
	Exempt Vehicles	0	0		0	0	\$0	\$0	\$0
Propane	Cars and Station Wagons	0		0	0	0	\$0	\$0	\$0
	LDTs, Vans and SUVs	17		139,224	10,537	506	\$23,925	\$882	\$21,444
	Exempt Vehicles	8	4		6,508	365	\$15,816	\$601	\$5,126
Electric	LDTs, Vans and SUVs	3		536		0		\$0	\$0

Many management functions of the Missouri State Fleet are decentralized. Day-to-day decisions and record keeping tasks are performed by each agency. Therefore, the operations data used to generate this table were provided by the Missouri State Agencies that use on-road and off-road vehicles to accomplish their official duties.

Exempt vehicles are those vehicles that for reasons given in RSMo 414.400 - 414.417 are exempt from vehicle fuel efficiency and alternative fuel requirements. Eligible vehicles include only those vehicles that are eligible to meet vehicle fuel efficiency and alternative fuel requirements specified in RSMo 414.400-414.417.

At-the-pump units are cubic feet for CNG; kwh for electric; and gallons for gasoline, diesel, E85 and propane. Biodiesel (B100) consumption figures are shown on the summary table under the diesel vehicle categories as the alternative fuels.

State organizations included under the category of other state organizations are the State Offices of the Governor, Lieutenant Governor, Legislature and Judiciary.

Estimated values are shown on four summary tables - the Missouri Department of Public Safety table, the Secretary of State table, the Missouri Department of Transportation table and the overall Missouri State Fleet table. On the Department of Public Safety table, estimated values are shown under the exempt gasoline vehicle category. On the Secretary of State table, estimated values are shown under the gasoline vehicle category of cars and station wagons. On the Missouri Department of Transportation table, estimated values are shown under the exempt diesel vehicle category.

Additions and omissions from the 2005 report - two agencies made changes to inter-agency reporting methods since submitting agency vehicle information for the 2005 report. The Missouri Department of Transportation reported 357 additional exempt ethanol 85 vehicles, and the Missouri Department of Corrections reported 104 fewer gasoline cars and station wagons.

**SUMMARY TABLE
VEHICLE OPERATIONS**

**ATTORNEY GENERAL
Fiscal Year 2009**

Vehicle Type	Description	Number of Vehicles		Miles Traveled	Fuel Consumption (at-the-pump units)		Cost

**SECRETARY OF STATE
Fiscal Year 2009**

Vehicle Type	Description	Number of Vehicles		Miles Traveled	Fuel Consumption (at-the-pump units)		Cost		
		<= 8500 lbs	> 8500 lbs		Gas or Diesel	Alternative Fuel	Gas or Diesel	Alternative Fuel	Maintenance
Gasoline	Cars and Station Wagons	3		26,667	988		\$2,415		\$1,340
	LDTs, Vans and SUVs	1		9,902	591		\$1,543		\$488
	Exempt Vehicles	1	0		373		\$1,058		\$97
Hybrid	Cars and Station Wagons	0		0	0		\$0		\$0
	LDTs, Vans and SUVs	0		0	0		\$0		\$0
	Exempt Vehicles	0	0		0		\$0		\$0
Diesel	Cars and Station Wagons	0		0	0	0	\$0	\$0	\$0
	LDTs, Vans and SUVs	0		0	0	0	\$0	\$0	\$0
	Exempt Vehicles	0	1		716	0	\$2,047	\$0	\$321
E85	Cars and Station Wagons	5		51,365	565	1,615	\$1,360	\$3,801	\$2,548
	LDTs, Vans and SUVs	2		18,523	202	812	\$553	\$1,787	\$230
	Exempt Vehicles	0	0		0	0	\$0	\$0	\$0
CNG	Cars and Station Wagons	0		0	0	0	\$0	\$0	\$0
	LDTs, Vans and SUVs	0		0	0	0	\$0	\$0	\$0
	Exempt Vehicles	0	0		0	0	\$0	\$0	\$0
Propane	Cars and Station Wagons	0		0	0	0	\$0	\$0	\$0
	LDTs, Vans and SUVs	0		0	0	0	\$0	\$0	\$0
	Exempt Vehicles	0	0		0	0	\$0	\$0	\$0
Electric	LDTs, Vans and SUVs	0		0		0		\$0	\$0

Many management functions of the Missouri State Fleet are decentralized. Day-to-day decisions and record keeping tasks are performed by each agency. Therefore, the operations data used to generate this table were provided by the Missouri State Agencies that use on-road and off-road vehicles to accomplish their official duties.

Exempt vehicles are those vehicles that for reasons given in RSMo 414.400 - 414.417 are exempt from vehicle fuel efficiency and alternative fuel requirements. Eligible vehicles include only those vehicles that are eligible to meet vehicle fuel efficiency and alternative fuel requirements specified in RSMo 414.400-414.417.

At-the-pump units are cubic feet for CNG; kwh for electric; and gallons for gasoline, diesel, E85 and propane. Biodiesel (B100) consumption figures are shown on the summary table under the diesel vehicle categories as the alternative fuels.

State organizations included under the category of other state organizations are the State Offices of the Governor, Lieutenant Governor, Legislature and Judiciary.

Estimated values are shown on four summary tables - the Missouri Department of Public Safety table, the Secretary of State table, the Missouri Department of Transportation table and the overall Missouri State Fleet table. On the Department of Public Safety table, estimated values are shown under the exempt gasoline vehicle category. On the Secretary of State table, estimated values are shown under the gasoline vehicle category of cars and station wagons. On the Missouri Department of Transportation table, estimated values are shown under the exempt diesel vehicle category.

Additions and omissions from the 2005 report - two agencies made changes to inter-agency reporting methods since submitting agency vehicle information for the 2005 report. The Missouri Department of Transportation reported 357 additional exempt ethanol 85 vehicles, and the Missouri Department of Corrections reported 104 fewer gasoline cars and station wagons.

CNG	Cars and Station Wagons	0		0	0	0	\$0	\$0	\$0
	LDTs, Vans and SUVs	0		0	0	0	\$0	\$0	\$0
	Exempt Vehicles	0	0		0	0	\$0	\$0	\$0
Propane	Cars and Station Wagons	0		0	0	0	\$0	\$0	\$0
	LDTs, Vans and SUVs	0		0	0	0	\$0	\$0	\$0
	Exempt Vehicles	0	0		0	0	\$0	\$0	\$0
Electric	LDTs, Vans and SUVs	0		0		0		\$0	\$0

Many management functions of the Missouri State Fleet are decentralized. Day-to-day decisions and record keeping tasks are performed by each agency. Therefore, the operations data used to generate this table were provided by the Missouri State Agencies that use on-road and off-road vehicles to accomplish their official duties.

Exempt vehicles are those vehicles that for reasons given in RSMo 414.400 - 414.417 are exempt from vehicle fuel efficiency and alternative fuel requirements. Eligible vehicles include only those vehicles that are eligible to meet vehicle fuel efficiency and alternative fuel requirements specified in RSMo 414.400-414.417.

At-the-pump units are cubic feet for CNG; kwh for electric; and gallons for gasoline, diesel, E85 and propane. Biodiesel (B100) consumption figures are shown on the summary table under the diesel vehicle categories as the alternative fuels.

State organizations included under the category of other state organizations are the State Offices of the Governor, Lieutenant Governor, Legislature and Judiciary.

Estimated values are shown on four summary tables - the Missouri Department of Public Safety table, the Secretary of State table, the Missouri Department of Transportation table and the overall Missouri State Fleet table. On the Department of Public Safety table, estimated values are shown under the exempt gasoline vehicle category. On the Secretary of State table, estimated values are shown under the gasoline vehicle category of cars and station wagons. On the Missouri Department of Transportation table, estimated values are shown under the exempt diesel vehicle category.

Additions and omissions from the 2005 report - two agencies made changes to inter-agency reporting methods since submitting agency vehicle information for the 2005 report. The Missouri Department of Transportation reported 357 additional exempt ethanol 85 vehicles, and the Missouri Department of Corrections reported 104 fewer gasoline cars and station wagons.

Therefore, the operations data used to generate this table were provided by the Missouri State Agencies that use on-road and off-road vehicles to accomplish their official duties.

Exempt vehicles are those vehicles that for reasons given in RSMo 414.400 - 414.417 are exempt from vehicle fuel efficiency and alternative fuel requirements. Eligible vehicles include only those vehicles that are eligible to meet vehicle fuel efficiency and alternative fuel requirements specified in RSMo 414.400-414.417.

At-the-pump units are cubic feet for CNG; kwh for electric; and gallons for gasoline, diesel, E85 and propane. Biodiesel (B100) consumption figures are shown on the summary table under the diesel vehicle categories as the alternative fuels.

State organizations included under the category of other state organizations are the State Offices of the Governor, Lieutenant Governor, Legislature and Judiciary.

Estimated values are shown on four summary tables - the Missouri Department of Public Safety table, the Secretary of State table, the Missouri Department of Transportation table and the overall Missouri State Fleet table. On the Department of Public Safety table, estimated values are shown under the exempt gasoline vehicle category. On the Secretary of State table, estimated values are shown under the gasoline vehicle category of cars and station wagons. On the Missouri Department of Transportation table, estimated values are shown under the exempt diesel vehicle category.

Additions and omissions from the 2005 report - two agencies made changes to inter-agency reporting methods since submitting agency vehicle information for the 2005 report. The Missouri Department of Transportation reported 357 additional exempt ethanol 85 vehicles, and the Missouri Department of Corrections reported 104 fewer gasoline cars and station wagons.

Many management functions of the Missouri State Fleet are decentralized. Day-to-day decisions and record keeping tasks are performed by each agency. Therefore, the operations data used to generate this table were provided by the Missouri State Agencies that use on-road and off-road vehicles to accomplish their official duties.

Exempt vehicles are those vehicles that for reasons given in RSMo 414.400 - 414.417 are exempt from vehicle fuel efficiency and alternative fuel requirements. Eligible vehicles include only those vehicles that are eligible to meet vehicle fuel efficiency and alternative fuel requirements specified in RSMo 414.400-414.417.

At-the-pump units are cubic feet for CNG; kwh for electric; and gallons for gasoline, diesel, E85 and propane. Biodiesel (B100) consumption figures are shown on the summary table under the diesel vehicle categories as the alternative fuels.

State organizations included under the category of other state organizations are the State Offices of the Governor, Lieutenant Governor, Legislature and Judiciary.

Estimated values are shown on four summary tables - the Missouri Department of Public Safety table, the Secretary of State table, the Missouri Department of Transportation table and the overall Missouri State Fleet table. On the Department of Public Safety table, estimated values are shown under the exempt gasoline vehicle category. On the Secretary of State table, estimated values are shown under the gasoline vehicle category of cars and station wagons. On the Missouri Department of Transportation table, estimated values are shown under the exempt diesel vehicle category.

Additions and omissions from the 2005 report - two agencies made changes to inter-agency reporting methods since submitting agency vehicle information for the 2005 report. The Missouri Department of Transportation reported 357 additional exempt ethanol 85 vehicles, and the Missouri Department of Corrections reported 104 fewer gasoline cars and station wagons.

Many management functions of the Missouri State Fleet are decentralized. Day-to-day decisions and record keeping tasks are performed by each agency. Therefore, the operations data used to generate this table were provided by the Missouri State Agencies that use on-road and off-road vehicles to accomplish their official duties.

Exempt vehicles are those vehicles that for reasons given in RSMo 414.400 - 414.417 are exempt from vehicle fuel efficiency and alternative fuel requirements. Eligible vehicles include only those vehicles that are eligible to meet vehicle fuel efficiency and alternative fuel requirements specified in RSMo 414.400-414.417.

At-the-pump units are cubic feet for CNG; kWh for electric; and gallons for gasoline, diesel, E85 and propane. Biodiesel (B100) consumption figures are shown on the summary table under the diesel vehicle categories as the alternative fuels.

State organizations included under the category of other state organizations are the State Offices of the Governor, Lieutenant Governor, Legislature and Judiciary.

Estimated values are shown on four summary tables - the Missouri Department of Public Safety table, the Secretary of State table, the Missouri Department of Transportation table and the overall Missouri State Fleet table. On the Department of Public Safety table, estimated values are shown under the exempt gasoline vehicle category. On the Secretary of State table, estimated values are shown under the gasoline vehicle category of cars and station wagons. On the Missouri Department of Transportation table, estimated values are shown under the exempt diesel vehicle category.

Additions and omissions from the 2005 report - two agencies made changes to inter-agency reporting methods since submitting agency vehicle information for the 2005 report. The Missouri Department of Transportation reported 357 additional exempt ethanol 85 vehicles, and the Missouri Department of Corrections reported 104 fewer gasoline cars and station wagons.

At-the-pump units are cubic feet for CNG; kwh for electric; and gallons for gasoline, diesel, E85 and propane. Biodiesel (B100) consumption figures are shown on the summary table under the diesel vehicle categories as the alternative fuels.

State organizations included under the category of other state organizations are the State Offices of the Governor, Lieutenant Governor, Legislature and Judiciary.

Estimated values are shown on four summary tables - the Missouri Department of Public Safety table, the Secretary of State table, the Missouri Department of Transportation table and the overall Missouri State Fleet table. On the Department of Public Safety table, estimated values are shown under the exempt gasoline vehicle category. On the Secretary of State table, estimated values are shown under the gasoline vehicle category of cars and station wagons. On the Missouri Department of Transportation table, estimated values are shown under the exempt diesel vehicle category.

Additions and omissions from the 2005 report - two agencies made changes to inter-agency reporting methods since submitting agency vehicle information for the 2005 report. The Missouri Department of Transportation reported 357 additional exempt ethanol 85 vehicles, and the Missouri Department of Corrections reported 104 fewer gasoline cars and station wagons.

Appendix C

When identified throughout the report, gasoline gallon equivalence (GGE) is used as a unit of measure for alternative fuels. As a unit of measure, gasoline gallon equivalence is based on the fuel's energy content rather than the at-the-pump unit of measure normally shown in unit volume. An example of this is the comparison of a gallon of 85 percent ethanol (E85) to a gallon of gasoline. Since the energy content of E85 is less than that of gasoline, one gallon of E85 is equivalent to 0.7130 gallon of gasoline.

Unit Consumption Conversion Table of Vehicle Motor Fuels, At-the-Pump Units to Gasoline Gallon Equivalence (GGE)

Fuel Type	At-the-Pump Units	BTU/Unit	GGE/Unit
Gasoline	Gallon	115,000	1.0000
E85	Gallon	82,000	0.7130
Propane	Gallon	89,000	0.7739
CNG	Cubic Feet	1,000	0.0087
Diesel	Gallon	130,000	1.1304
Biodiesel (20)	Gallon	128,800	1.1200
Biodiesel (100)	Gallon	124,200	1.0800
Electric	Kilowatt hour	3,413	0.0297

Appendix D

- **Average Fleet Fuel Economy of New Acquisition Passenger Cars**
- **Average Fleet Fuel Economy of New Acquisition Light-Duty Trucks**
- **Percent Alternative Fuel Vehicles of all New Vehicle Acquisitions**
- **Percent Alternative Fuel Usage in Alternative Fuel Vehicles - B-20 and Exempt Usage Not Included**
- **Percent Alternative Fuel Usage in Non-Exempt and Exempt Alternative Fuel Vehicles – B20 Usage Included in Diesel Vehicles**

**AVERAGE FLEET FUEL ECONOMY
NEW ACQUISITION PASSENGER CARS**

**MISSOURI STATE FLEET
FISCAL YEAR 2009**

Shown in RSMo 414.400 - 414.417, " the overall vehicle fuel efficiency for each agency to meet or exceed the fuel efficiency that would be achieved if each vehicle in the agency's fleet met the CAFE standard." The CAFE standard for newly built passenger cars is 27.5 MPG. Throughout the following table, the average vehicle fuel efficiency of all new acquisition passenger cars is shown for each agency. Passenger cars include both cars and station wagons that are eligible to meet vehicle fuel efficiency standards. If an agency is not shown, the agency did not report acquiring any new passenger cars that were eligible to meet state vehicle fuel efficiency requirements throughout the fiscal year.

DEPARTMENT OF AGRICULTURE	37.3
DEPARTMENT OF CONSERVATION	37.5

MISSOURI STATE FLEET	36.0

**AVERAGE FLEET FUEL ECONOMY
NEW ACQUISITION LIGHT DUTY TRUCKS**

**MISSOURI STATE FLEET
FISCAL YEAR 2009**

Shown in RSMo 414.400 - 414.417, " the overall vehicle fuel efficiency for each agency to meet or exceed the fuel efficiency that would be achieved if each vehicle in the agency's fleet met the CAFE standard." The CAFE standard for newly built light duty trucks is 20.7 MPG. Throughout the following table, the average vehicle fuel efficiency of all new acquisition light duty trucks is shown for each agency. Light duty trucks include trucks, vans and SUVs that are eligible to meet vehicle fuel efficiency standards. If an agency is not shown, the agency did not report acquiring any new light duty trucks that were eligible to meet state vehicle fuel efficiency requirements throughout the fiscal year.

**PERCENT ALTERNATIVE FUEL VEHICLES
OF ALL NEW VEHICLE ACQUISITIONS**

**MISSOURI STATE FLEET
STATUTORY PERIOD 2009**

Since agencies that operate less than 16 eligible vehicles are not subject to program acquisition requirements described in RSMo 414.400 – 414.417, only agencies that operate greater than 15 eligible vehicles are shown in the following table. Shown in RSMo 414.410, at least 70 percent of an agency's fleet vehicle acquisitions over a one year statutory period shall be vehicles capable of using alternative fuels.

DEPARTMENT OF AGRICULTURE	100.0%
DEPARTMENT OF CONSERVATION	100.0%
